

Idea-to-Product Solutions

© fishpond design. Please visit www.fishpondusa.com to see other great designs by fishpond.

Do You Need Solutions for These Types of Problems?

- Engineering design conceived but not finished?
- Need a solid model, rapid prototype, and production plan for your product?
- Does your product or part have specific testing or acceptance criteria?
- Do you specify advanced aluminum alloys and stainless in aerospace, medical equipment, or firearms?
- Want access to production assets without adding capital cost?
- Do you have too many suppliers to manage?

Industry Experience

AEROSPACE

- Aircraft hydraulic components
- Aircraft structural components
- Aircraft compressor components

MEDICAL

- Blood motor-pump units
- X-ray machine collimator assembly
- Breast mammography paddles
- Perfect finish, highly cosmetic laboratory equipment

FIREARMS

- Firearm rail systems
- Law enforcement Harley-Davidson suspension products
- Non-lethal firearm for crowd control

Our Areas of Expertise:

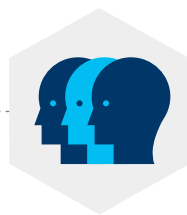

- Design for manufacturing and packaging
- Tight angles, complex geometries and specifications
- Product variations and families that require various lot sizes
- Rapid prototyping, quotation, and can-do response
- Reducing complexity by managing your inventory
- Kanbans to supply your production schedule
- Order fulfillment and warranty service
- New product development and refresh
- Partnering side by side with you – right now
